

**METZGER/McGUIRE**

## *Gold Seal Program*

Knowledgeable facility owners, designers and builders know that one of the most important elements in every industrial facility is the concrete floor. They also know that one of the keys to achieving long term floor durability and performance is a proper floor joint filler installation with a top quality semi-rigid joint filler.

Our "Gold Seal Program" was developed to help you obtain the best filler installation possible. This comprehensive quality-assurance program includes Metzger/McGuire's direct involvement and representation at most or all phases of the design, construction and post-occupation of your new facility;

- **Consultation services during the design phase**
- **Recommendations on quality installation contractors**
- **Participation in pre-slab construction meetings**
- **On-site representation at the beginning of joint filling**
- **Project tracking from bid stage through to project end**
- **Troubleshooting (if required) during filler installation**
- **Participation in the one year warranty walk-through**
- **Annual floor condition assessments (if requested by owner)**

**– and –**

**A FIVE (5) YEAR MATERIAL WARRANTY on MM-80 or  
A THREE (3) YEAR MATERIAL WARRANTY on  
Spal-Pro RS 88, Spal-Pro RSF or Edge-Pro 80**

**Extended Labor Warranties Available through Select Applicators**

To qualify your project for Gold Seal status, you merely need to require that one or more Metzger/McGuire fillers be used on your projects that exceed 500,000 sq. ft. in size. Smaller projects may qualify depending upon size, location or other circumstances. Metzger/McGuire may limit the number of projects granted Gold Seal status in any given year depending on our ability to properly service them.

The basic cost for Gold Seal Program services is \$2,500, but this cost may be lowered, or waived entirely, for certain clients. The Gold Seal Program is your best assurance of a quality, durable floor joint filler installation.

Please contact Scott Metzger at **800-223-MM80** to find out if your project qualifies for this unique, valuable service.
